

Building your own career

GEA Refrigeration

GEA Refrigeration

Building your own career

GEA Refrigeration, the refrigeration division of GEA Group, is the worldwide market leader in industrial refrigeration. We offer our customers high-quality refrigeration systems and components to help facilitate their industrial operations. This is largely thanks to the robust organization at GEA Refrigeration. A worldwide network of component manufacturers, installation and service companies and sales offices guarantee that the customer's solution is always within reach.

global network

Our customers operate in markets such as the food industry, oil & gas and (petro) chemical industries, storage and distribution as well as the maritime, public utilities and leisure. The services offered by GEA Refrigeration cover the entire spectrum of refrigeration technology:

- system design
- component manufacturing
- installation
- service & maintenance
- commissioning

Whichever refrigeration solutions you require, GEA Refrigeration has the proven expertise, technologies and personnel for you. Whether it concerns a mega cheese warehouse in Spain, freezing shrimps in North Africa, keeping gases in liquid form during ocean transport, controlling the temperature in clean rooms, cooling freshly poured concrete or building a skiing hall in Dubai. All services are the result of a thorough understanding of the customer's needs and are based on continuous innovation in refrigeration solutions. All this is made possible by a company with a history of 150 years and based on a worldwide network of 45 companies and around 3,800 employees.

Human Resources

Breaking new ground

People working at GEA Refrigeration all have one thing in common: they are proud of what they achieve together. Within the worldwide organisation of around 3,800 employees, each and every person has the opportunity to let their own ideas take shape, to carry through ground-breaking projects and so to become the architect of their own personal development. With the support of an optimized range of training opportunities, both locally and internationally.

Contracting & Manufacturing

Within an international organization employees in Contracting at GEA Refrigeration experience the ultimate satisfaction of contributing to the most attractive and challenging projects on the market. In Manufacturing the employees gain inspiration from the development of technologically refined products, with a sharp eye for quality and sustainability.

Making the difference

Working at GEA Refrigeration opens up a full range of opportunities in an open and innovative environment giving employees the personal responsibility and ability to make a real difference. The corporate culture within GEA encourages employees to challenge each other's professional opinions and ideas to enable them to develop the best solution. The refrigeration business is about people that can accept and carry responsibility from contact with the customer through to follow up with the individual business and colleagues from other GEA Refrigeration companies.

culture

Get to know the world through your work

Professionals with ambition and competence at all levels will find at GEA Refrigeration the international environment that can bring out the best in them, giving them the opportunity to cooperate closely with colleagues from other countries, to learn about other cultures and to exchange and share knowledge of best practices. You will literally get to know the world through your work.

This dynamic career prospect applies in particular for:

- creative and innovative technical experts in refrigeration
- managers that can and do get the best out of others
- project managers that can successfully complete a team project

making the difference

GEA Group

Worldwide engineering excellence

With about 250 companies and 20,000 employees in 50 countries, GEA Group AG is a technology leader on a worldwide scale. In 2007 the group achieved a turnover of 5.2 billion euros. The global group focuses on Mechanical Engineering in two fundamental sectors, namely heat transfer (heating, cooling, freezing) and mass exchange (separating, drying, distilling, pumping, dosing and stacking). GEA manufactures components, systems and complete production lines. For the customer this largely involves customized solutions.

As a leading international enterprise, GEA has founded its own GEA Academy. This offers a host of internal training opportunities in support of the (international) career prospects. The opportunities offered vary from individual training in a multitude of technical and administrative disciplines through to sharing at GEA level in the collective know-how relating to standardised best practices in a technology concern.
